Subject: Invitation to attend #TTV2 workshop

Dear Asst. Prof. Tsai,

We are organizing the 2<sup>nd</sup> Taiwan-Thailand-Vietnam Workshop on Theoretical and Computational Chemistry at the Sirindhorn Science Home, Thailand Science Park, Pathum Thani (Bangkok), Thailand, during **17-20 January, 2019**. In this workshop, we will have general lecture talks to learn available computational methods, hand-on technical training in computational chemistry, as well as having poster and oral presentation opportunities for the young scientist, postdoctoral fellows, and students. The workshop is aimed to encourage discussion in the field of theoretical and computational studies by focusing on the graduate students, research scientists, and staffs from academia in these three countries. By detailed exchange of information, we hope that this type of interaction will lead to collaborations in the future.

**Scientific Program for #TTV2 is as following;**

**Day 1-2: 2<sup>nd</sup> TTV seminar, 17-18 January 2019**

**Day 3: Workshop on "Practical VASP for Materials Design" 19 January 2019**

**Day 4: Excursion and research discussion, 20 January 2019**

For more information, please visit: <https://www2.nanotec.or.th/ttv2/>

On the behalf of organizing committee, I would like to invite you to attend this workshop.

As a part of the organizing committee, we would like to offer:

1. Registration fee waive
2. Accommodation during workshop (You can check your room detail after December 15, 2018)
3. All workshop social activities (including breakfast, lunches, dinners, and excursion)

We believe that your contribution in this workshop will be very fruitful for our Theoretical and Computational Chemistry research community. We are looking forward to meeting you.

Yours sincerely,

(Supawadee Namuangruk)  
Chairman of Organizing Committee
